

KSS 800 - AN EFFORTLESS ELEVATOR EXPERIENCE

The KSS 800 destination signalization family features a range of finish options, including anti-fingerprint stainless steel, and attractive signalization alternatives.

KONE DESTINATION SIGNALIZATION

Unlike conventional elevator control systems, which only register the desired travel direction, our system takes into account desired destination floors and the number of waiting passengers to significantly improve efficiency and convenience.

We offer traditional and hybrid systems. With the traditional system elevators are called using destination operating panels in the lobby and there are no operating panels in the elevator car. The hybrid system includes destination operating panels in the lobby and normal operating panels in the elevator cars.

DESTINATION GUIDANCE DISPLAY (DGD)

A display device KSG 857 is used with KONE Turnstile 1000 (KT1000) in case of integration with KONE Destination Control System and KONE Access or 3rd party ACS provider. Similar device KSG 847 is used with 3rd party turnstiles. They activate a direct home-floor call when a person passes through the turnstile.
